

Butterfly Surveys at the Greenbelt Monarch Habitat

8:00 am • July 6 & 27, Aug 3, 17 & 31,
Sept 7 & 21, 2024

Interested in helping conserve the Western Monarch butterfly? The butterflies are in decline due to a loss of habitat, specifically native milkweed. Come be a community scientist and gather data on eggs, caterpillars and butterflies. Training will be provided.

Things to bring:

- Water
- Hat
- Sunscreen
- Sturdy shoes
- Smart phone with iNaturalist app
- Kneeling pad (recommended)

Surveys involve stooping, bending and kneeling on the ground. Ability to use a smart phone with the iNaturalist app is helpful but not required.

For more information about Monarchs:
